EDUCATION

Carnegie Mellon University

Bachelor of Science in Information Systems, Minor in Computer Science

Aug 2020 – May 2024

GPA: 3.76 (Dean's List)

EXPERIENCE

Atlassian

San Francisco, CA (Remote)

Software Engineer, P40 — Central AI (Rovo Growth & Search)

Jun 2024 – Present

- **Rovo Chrome Extension (0-to-1 & Growth):** Built and scaled the extension (TypeScript, React, service workers) surfacing AI chat and enterprise search; grew to **20K+ downloads** and **~7K MAU**. Shipped an NTP chat experiment driving a **+20.1% increase** in message-sent events.
- **Architecture & Scale:** Designed and delivered URL routing handling **10,000+ daily requests**, coordinating across 4 teams for DNS and subdomain migrations. Defined the growth team's experimentation infrastructure (custom metrics, standardized Statsig tagging).
- **Product Engineering:** Co-led E2E delivery of a 3P Bulk Connect feature, bypassing a backend API update with a creative frontend approach to accelerate the launch. Implemented dynamic FE configs for 3P connectors, reducing onboarding from 10+ file edits to a single contract. Migrated core enterprise search packages to React 18.

Kreatify

San Francisco, CA

Co-Founder & CTO

Oct 2024 – Apr 2025

- **0-to-1 Full-Stack:** Co-founded and built an influencer CRM SaaS for talent agencies from scratch (**Next.js**, **Supabase**) — OAuth onboarding, role-based access control, file handling, and Phyllo API integrations (YouTube, TikTok, Instagram).
- **Product Validation:** Conducted user interviews, iterated on UX/UI, and deployed and managed a private beta with **30+ users across 7 talent agencies**. Established CI/CD pipelines and engineering standards.

Atlassian

New York City, NY

Software Engineer Intern — Halp (Atlassian Assist)

May 2023 – Aug 2023

- Migrated a Slack-based ticketing bot from legacy Slack messaging to **Block Kit** (TypeScript/Node), modernizing the conversational ticket-creation UX and partnering with infrastructure for safe rollout.

Carnegie Mellon University

Pittsburgh, PA

CS Teaching Assistant

Aug 2022 – May 2024

- Led recitations and labs for 15+ cohorts, teaching Python fundamentals, systems programming, and database design.

Comcast Labs

Philadelphia, PA

AI Research Intern

May 2022 – Aug 2022

- Prototyped a transformer-based headline classifier achieving **97% accuracy**, deployed on embedded devices. Built D3.js visualizations over unstructured Splunk datasets to surface anomalies.

Great Point Capital

Chicago, IL (Remote)

Research Assistant / High-Frequency Trading

Jun 2020 – Feb 2022

- Automated market-data extraction in Python, **reducing processing time by 95%**, and built a reusable TensorFlow/Keras pipeline that improved trading-signal accuracy by 5%.

PROJECTS

Gooni — Agentic Workspace & MCP Server

Engineered a full-stack AI workspace combining LLM chat with structured note-taking, backed by a persistent multi-tiered memory architecture. Designed a custom memory pipeline for context extraction, embedding and injection; evaluated a managed alternative (**mem0**) and migrated back to the in-house pipeline when the hosted layer didn't justify its cost. Built a **Model Context Protocol (MCP)** server exposing the memory layer to external clients for autonomous, cross-application read/write.

FastAPI, React (TypeScript), SQLite, Fly.io

Lucid — Full-Stack AI Knowledge Graph

Built a personal system that converts free-form journals into a structured knowledge graph of people, goals and events using LLM-assisted extraction. *FastAPI, PostgreSQL, React (TypeScript), OpenAI*

SKILLS

Languages: TypeScript, JavaScript, Python, C, SQL, Java, HTML/CSS, R, Ruby, C#, Swift

Frameworks/Tools: React, Next.js, Node.js, Express, FastAPI, Supabase, PostgreSQL, Docker, Git, LaunchDarkly
