

DANIEL GUNAWAN

San Francisco, CA

danielfgunawan1@gmail.com ♦ [linkedin.com/in/danielfgunawan](https://www.linkedin.com/in/danielfgunawan) ♦ danis-website.vercel.app

EDUCATION

Bachelor of Science in Information Systems, Carnegie Mellon University
Minor in Computer Science

Aug 2020 – May 2024
GPA: 3.76 (Dean's List)

SKILLS

Languages TypeScript, JavaScript, Python, C, SQL, Java, HTML/CSS, R, Ruby, C#, Swift
Frameworks/Tools React, Next.js, Node.js, Express, FastAPI, Supabase, PostgreSQL, Redis, Docker, Git

EXPERIENCE

Software Engineer, P40 — Central AI (Rovo Growth & Search)
Atlassian

Jun 2024 – Present
San Francisco, CA (Remote)

- **Experimentation at Scale:** Shipped **15+ experiments** across Rovo's most prominent surfaces — Jira, Confluence and Townsquare — reaching a large share of Atlassian's production customer base. Drove a **+20.1% increase** in message-sent events on extension chat. Defined the growth team's experimentation infrastructure (custom metrics, standardized Statsig tagging).
- **Rovo Chrome Extension (0-to-1 & Growth):** Built and scaled the extension (TypeScript, React) surfacing AI chat and enterprise search; grew it from **8K to 20K+ downloads** and **~7K monthly active users**.
- **Technical Leadership:** Tech lead on multiple initiatives across the org, owning scoping and end-to-end delivery and coordinating execution across teams.
- **AI Platform (current):** Started and lead a from-scratch microservice for one-shot LLM prompt serving — prompt definition, user-data hydration, model invocation, offline evaluation with configurable LLM judges, and deployment — exposing endpoints consumed directly by frontend surfaces. Separately own the frontend for a personalized AI insights experience and its nudge-scheduling system, spanning the application and Redis caching layers.

Co-Founder & CTO
Kreatify

Oct 2024 – Apr 2025
San Francisco, CA

- **0-to-1, Bootstrapped:** Co-founded and built an influencer-management CRM SaaS for talent agencies — the middlemen between brands and influencers — from nothing (**Next.js, Supabase**), including OAuth onboarding, role-based access control, file handling, and Phyllo API integrations (YouTube, TikTok, Instagram).
- **Product & Systems Ownership:** Independently designed and built the UX, and owned multiple core systems including a **Notion-style generic filtering engine**. Ran user interviews and iterated to a private beta of **40+ users across 7 talent agencies**.

Software Engineer Intern — Halp (Atlassian Assist)
Atlassian

May 2023 – Aug 2023
New York City, NY

- Migrated a Slack-based ticketing bot from legacy Slack messaging to **Block Kit** (TypeScript/Node), modernizing the conversational ticket-creation UX.

CS Teaching Assistant
Carnegie Mellon University

Aug 2022 – May 2024
Pittsburgh, PA

- Led recitations for 15+ cohorts, teaching the fundamentals of programming (Python) and database design.

AI Research Intern
Comcast Labs

May 2022 – Aug 2022
Philadelphia, PA

- Prototyped a transformer-based headline classifier (**97% accuracy**) deployed on embedded devices; built D3.js visualizations over Splunk datasets to surface anomalies.

Research Assistant — High-Frequency Trading
Great Point Capital

Jun 2020 – Feb 2022
Chicago, IL (Remote)

- Automated daily market-data extraction in Python, **reducing processing time by 95%**, and built a reusable TensorFlow/Keras pipeline that improved trading-signal accuracy by 5%.

PROJECTS

- **Gooni (Agentic AI Workspace).** Engineered a full-stack AI workspace built around a custom **orchestrator**, a persistent **memory system** with extraction and reconciliation, and a self-built **evaluation harness** — then used those evals to cut what didn't earn its place, including a ReAct/Reflexion layer that failed to beat the simpler pipeline. (*FastAPI, React/TypeScript, SQLite, Fly.io*)
