

DANIEL GUNAWAN

San Francisco, CA

danielfgunawan1@gmail.com ◇ [linkedin.com/in/danielfgunawan](https://www.linkedin.com/in/danielfgunawan) ◇ daniis-website.vercel.app

EDUCATION

Bachelor of Science in Information Systems, Carnegie Mellon University

Minor in Computer Science

Aug 2020 – May 2024

GPA: 3.76 (Dean's List)

EXPERIENCE

Software Engineer II — Central AI (Rovo Growth & Search)

Atlassian

Jun 2024 – Present

San Francisco, CA (Remote)

- **Third-Party Connector Experience (specialty):** Own the frontend for third-party *connectors* — the integrations that let Rovo search and act across external tools — across every Atlassian surface. Built a generic 3P frontend config so a connector added on the backend needs no bespoke frontend work, and shipped a portable connector-settings package now consumed by other Atlassian teams including Confluence and Townsquare. Drove **+23.7% third-party auth completions** and a **+3,229% lift** in settings discovery.
- **Experimentation at Scale:** Shipped **15+ experiments** across Rovo's most prominent surfaces — Jira, Confluence and Townsquare — reaching a large share of Atlassian's production customer base. Headline results: **+74.5% extension DAU**, **+45% Rovo button usage**, **+20.1% chat usage events**. Helped define the team's experimentation infrastructure (custom metrics, standardized Statsig tagging).
- **Rovo Chrome Extension (0-to-1 & Growth):** Built and scaled the extension (TypeScript, React) surfacing AI chat and enterprise search; grew it from **8K to 20K+ downloads** and **~7K monthly active users**.
- **Technical Leadership:** De facto feature lead on **4 concurrent initiatives**, owning scoping, sequencing and experiment strategy across product, design and eng. **270 PRs**, **500+ code reviews** across four repositories. Led cross-team Sev3 incident response; drove a migration removing **~\$10k/month** in cost.
- **AI Platform (current):** Started and lead a from-scratch microservice for one-shot LLM prompt serving — prompt definition, user-data hydration, model invocation, offline evaluation with configurable judges, and deployment — exposing endpoints consumed directly by frontend surfaces. Also own the frontend and nudge-scheduling system for a personalized AI surface, spanning the application and Redis caching layers.

Co-Founder & CTO

Kreatify

Oct 2024 – Apr 2025

San Francisco, CA

- **0-to-1, Bootstrapped:** Co-founded and built an influencer-management CRM SaaS for talent agencies — the middlemen between brands and influencers — (**Next.js**, **Supabase**), including OAuth onboarding, role-based access control, file handling, and Phyllo API integrations (YouTube, TikTok, Instagram).
- **Product & Systems Ownership:** Independently designed and built the UX, and owned multiple core systems including a Notion-style generic filtering engine. Ran user interviews and iterated to a private beta of **40+ users across 7 talent agencies**.

CS Teaching Assistant

Carnegie Mellon University

Aug 2022 – May 2024

Pittsburgh, PA

- Led recitations for 15+ cohorts, teaching the fundamentals of programming (Python) and database design.

AI Research Intern

Comcast Labs

May 2022 – Aug 2022

Philadelphia, PA

- Prototyped a transformer-based headline classifier (**97% accuracy**) deployed on embedded devices; built D3.js visualizations over Splunk datasets to surface anomalies.

Research Assistant — High-Frequency Trading

Great Point Capital

Jun 2020 – Feb 2022

Chicago, IL (Remote)

- Automated daily market-data extraction in Python, **reducing processing time by 95%**, and built a reusable Tensor-Flow/Keras pipeline that improved trading-signal accuracy by 5%.

PROJECTS

- **Gooni (Agentic AI Workspace).** Engineered a full-stack AI workspace built around a custom **orchestrator**, a persistent **memory system** with extraction and reconciliation, and a self-built **evaluation harness** — then used those evals to cut what didn't earn its place, including a ReAct/Reflexion layer that failed to beat the simpler pipeline. (*FastAPI, React/TypeScript, SQLite, Fly.io*)

SKILLS

Languages: TypeScript, JavaScript, Python, C, SQL, Java, HTML/CSS, R, Ruby, C#, Swift

Frameworks/Tools: React, Next.js, Node.js, Express, FastAPI, Supabase, PostgreSQL, Redis, Docker, Git
